

Product Security Notification for Biosense Webster CARTO® 3

July 2023

Security of medical devices is of utmost importance to all Johnson & Johnson Medical Device subsidiary companies, and we strive to maintain the best in industry security practices. We constantly monitor for vulnerabilities that could impact the safe operation of our portfolio of software-enabled medical devices, and we partner with each Johnson & Johnson Medical Device subsidiary company to define and execute timely remediation.

ACTION REQUIRED:

Biosense Webster has released two free-of-charge Security Service Packs for CARTO® 3 Versions 6 and 7.1 software. These comprehensive service packs are designed to enhance the security of the CARTO® 3 system. The Security Service Packs encompass a range of essential updates, patches, and advanced security controls. By installing these service packs, you will benefit from the latest advancements in security technology. We kindly encourage you to contact your local sales team to take advantage of these significant enhancements. They will be delighted to assist you in ordering and seamlessly installing the Security Service Pack.

Product Name	Version	Security Service Packs Kit Number
CARTO® 3	V6.0.70.100	C3 V6 Security Service Pack 5.0 Kit KT-0001-30
CARTO® 3	V6.0.80.45	C3 V6 Security Service Pack 5.0 Kit KT-0001-30
CARTO® 3	V7.1.80.33	C3 V7.1 Security Service Pack 6.0 Kit KT-0001-31

We appreciate your commitment to Johnson & Johnson as we work on patching to implement best security practices for our devices.

We highly recommend updating to the latest versions of CARTO®. By doing so, you can rest assured that your product will have the most up-to-date security updates.

Thank You
