Johnson&Johnson

Product Security Notification for Biosense Webster CARTO® 3

May 2024

The security of medical devices is of utmost importance to all Johnson & Johnson Medical Device subsidiary companies, and we strive to maintain the best industry security practices. We constantly monitor for vulnerabilities that could impact the safe operation of our portfolio of software-enabled medical devices, and we partner with each Johnson & Johnson Medical Device subsidiary company to define and execute timely remediation.

<u>ACTION REQUIRED:</u>

Biosense Webster has released a free-of-charge Security Service Pack for CARTO® 3 Version 7.2 software.

This comprehensive service pack is designed to enhance the security of the CARTO® 3 system.

The Security Service Pack encompasses a range of essential updates, patches, and advanced security controls.

By installing this service pack, you will benefit from the latest advancements in security technology.

We kindly encourage you to contact your local sales team to take advantage of these significant enhancements.

They will be delighted to assist you in ordering and seamlessly installing the Security Service Pack.

Product Name	Version	Security Service Packs Kit Number
CARTO® 3	7.2.40.363	C3 V7.2 Security Service Pack 7.0 Kit	KT-0001-39
CARTO® 3	7.2.40.250	C3 V7.2 Security Service Pack 7.0 Kit	KT-0001-39

We appreciate your commitment to Johnson & Johnson as we work on patching and implementing best security practices for our devices.

We highly recommend updating to the latest versions of CARTO®. By doing so, you can rest assured that your product will have the most up-to-date security updates.

Please contact your local sales team if you have additional questions about this letter.

Best regards,

Or Yaacobovich
